CATALOGUE OF SPECIMENS IN THE MATERIA MEDICA COLLECTION OF THE UNITED STATES NATIONAL MUSEUM, DECEMBER 1, 1884.

EXPLANATIONS.

Letters (A, B & C) refer to classes of animal products, according to the preceding classification.

Arabic numerals refer to botanical orders.

The asterisk (*) indicates those specimens classed under "products of fermentation and distillation."

Roman numerals refer to the classification of chemical substances.

The abbreviation M. F. indicates that the specimen may be found in the section illustrative of "medicinal forms."

The specimens in the collection are arranged in the cases according to the preceding classification, beginning immediately after "medicinal forms," and continuing in regular order from left to right. The first specimen in each *class* is indicated by the appropriate symbol of the class, and also each *natural order* by its name and number.
